I step aside. I support the groups decision and don't need to be involved.
I really like it. It's great and it works like a charm for me.
I have some slight concerns but I can live with it. I'll support the group actively.
Not perfect but it's good enough. I disagree with a few points. But I'll support the group.
Disagreements are so serious that I'm not willing to support this decision actively. Group can still continue but without my involvement.
I don't understand the proposal and / or I need more discussion before I can support this decision.
I understand the proposal but do not support it! I can explain my concerns.
Your concerns won't be heard. If this prevents you from agreeing to the proposal than choose 4, 5 or 6 instead.
Prepare yourself to explain what bothers you.
